# DAF Infotainment Systems

All New Generation DAF XD, XDC, XF, XFC, XG, and XG<sup>+</sup> feature the DAF Infotainment System accessible through the additional 10 inch display in the centre of the dashboard. The DAF Infotainment System ensures every driver's comfort from their driving seat by offering modern audio, phone connectivity, and additional tools within arm's reach.

## **DAF Infotainment System Basic\* (02825)**

The standard DAF Infotainment System has an integrated radio (FM/DAB/DAB<sup>+</sup>), and offers streaming functionalities via USB and Bluetooth. Including:

- audio and telephone information shown on the digital instrument panel
- up to two simultaneous phone connections
- control of audio and phone functions through the steering wheel switches

It also includes an additional 10" display which:

- offers Apple Carplay and Android Auto projection via USB connection
- shows rear view camera footage

\* The DAF Infotainment System Basic is still available in selected markets without additional display (option 06211).

## **DAF Infotainment System including DAF Truck Navigation (03684)**

The DAF Infotainment System including DAF Truck Navigation offers DAF Truck Navigation directly on the additional display of the DAF Infotainment System. The DAF Truck Navigation app is a significant step up from your average navigation app. It includes truck specific instructions, customised to the vehicle. Furthermore, it offers connected navigation and PACCAR Connect integrated features such as remote itinerary planning. The option DAF Infotainment System including DAF Truck Navigation includes a 5-year navigation updates software plan. Software updates are performed over-the-air. Map updates can be downloaded over Wi-Fi connection.

## **DAF Infotainment System including DAF Truck Navigation and Connected Tablet Preparation (04553)**

The DAF Infotainment System including DAF Truck Navigation and Connected Tablet Preparation additionally includes a separately PACCAR Parts supplied and invoiced 8-inch ruggedized IP68 water resistant PACCAR Connect tablet. A preparation to fix this tablet to the dashboard is delivered with the vehicle. The PACCAR Parts package (1552673), including tablet and mounting accessories is delivered separately. The

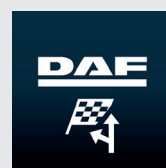

tablet allows the fleet owners to push routes and route planning to the trucks for optimal efficiency and lets you use DAF Truck Navigation. Additionally, 3rd party apps can be installed. This option comes with a 5-year tablet and over-the-air navigation updates software package.
